DIAMOND GLOW AND LASER FACIAL INFORMATION

WHAT IS THE DIAMOND GLOW AND LASER FACIAL AND HOW DOES IT WORK?

Diamond Glow and Laser Facial is a non-invasive, 5-in-1 dermatological treatment that simultaneously exfoliates, extracts, and infuses the skin with condition specific serums for an all-inclusive one step treatment for optimum skin health followed by a gentle laser to target skin tone, redness and pigmentation and collagen stimulation. The diamond tip used to exfoliate the skin loosens dry and damaged cells for gentle resurfacing and rejuvenation. The closed-looped vacuum pressure is then able to remove these dead skin cells as well as dirt, debris, and bacteria. At the exact point of exfoliation and extraction, condition specific serums are simultaneously driven deeper into epidermal layers when the skin is most penetrable for enhanced results. A laser, depending on your skin concerns is then used to target skin tone and boost collagen production.

WHAT SPECIFIC SERUMS WILL BE USED?

Based on the consultation we will choose the most appropriate condition specific serum for you. There are a number of serums which can focus on a variety of concerns e.g. hydration, congestion.

WHAT LASER WILL BE USED?

Based on the consultation we will choose the most appropriate laser for your concern. There are a number of laser that are specific to redness, pigmentation and collagen production which can focus on a variety of concerns such as sunspots, red under tones, inflammation from acne and collagen stimulation.

PRE-TREATMENT INFORMATION:

It is advised to avoid using exfoliating skincare to the treatment area 2-3 days prior to treatment as this can increase and prolong redness and irritation.

Cold sores to the face are contraindicated therefore should you have one please call to rearrange your appointment.

HOW COMFORTABLE IS THE TREATMENT?

The Diamond Glow and Laser Facial is a very comfortable treatment. You will feel a mild 'sandpaper' like and suction sensation. The laser will feel like a warm heating sensation or a light snapping sensation depending on the laser used.

HOW LONG IS THE DOWNTIME?

There is almost no downtime after the Diamond Glow and Laser facial treatment. The skin may be slightly red or flushed post treatment but this will resolve in a one to two hours. You can return to your daily activities immediately after this. The use of some collagen stimulating laser may have 1-2 days of downtime and a sand paper like feeling. Your practitioner will let you know which laser you are having to know what to expect.

HOW MANY TREATMENTS WILL I NEED?

Each individual concern will depend on the number of treatments needed. For concerns such as pigmentation, redness, and acne/congestion we recommend a course of 4 treatments at monthly intervals. For general skin maintenance we recommend a treatment every 6-8 weeks.

HOW LONG BEFORE I SEE RESULTS?

Many patients see results quickly, within a few days, however, your skin will continue to repair and renew over 4 weeks.

PRICE:

Treatments start from £550 per session but are depending on what laser is used. Course package prices are available.

AFTERCARE

After your Diamond Glow and Laser facial treatment, please refrain from using exfoliating products and other acids for 1-3 days depending on your skin sensitivity.

Please make sure to use SPF 30+ daily. This will insure the best result possible.

We recommend not waxing the treated area for 5 days after your treatment date.

Some patients may be slightly red or pink for a few days.

Breakouts post treatment, known as purging, are common especially in oily/congested skin.

MEDICATION ADMINISTERED PRE OF DURING TREATMENT:

Routinely there are no medications administered pre or during his treatment however this treatment can often be combined with other treatments that may require topical local anaesthetic cream.

Should you need any further advice, or would like to book in for your next session of treatment, please call **0207 034 5999**, alternatively, you can email us at **info@phiclinic.com**
