

FAT DISSOLVING INJECTION

PATIENT INFORMATION & AFTERCARE GUIDANCE

LAST UPDATED: JUNE 2023

PHI CLINIC, 102 HARLEY STREET,
LONDON, W1G 7JB

TEL: 020 7034 5999

FAT DISSOLVING INJECTION INFORMATION

WHAT IS SRS PHOSPHATIDYCHOLINE AND DEOXYCHOLATE, AND WHAT IS IT USED FOR?

SRS™ phosphatidylcholine and Deoxycholate are enzymes that enable targeted fat reduction of stubborn fat deposits. Based on the principle of lipolysis, the product can break down the cell membranes of fat cells and thus enable the removal of stored fat from the tissue. **SRS Phosphatidylcholine and Deoxycholate** is basically suitable for fat deposits up to a medium size. The active ingredients **phosphatidylcholine** and **deoxycholate** ensure that the fat stored in the fat cells is emulsified so that the body's own metabolism can break it down. It is always advised that patients maintain a good exercise regime and healthy diet for longer-lasting results.

HOW OFTEN SHOULD I HAVE THE TREATMENT AND HOW MANY WILL I NEED?

On average, our patients will have 1-6 sessions to see the desired result. It is advised that patients have treatment every 4-6 weeks.

IS THERE ANY DOWN TIME?

Patients may encounter some swelling and sensitivity in the treated area. Please note that if you are having larger areas treated, you may need to take the following day after treatment to rest. Results will continue to show after a period of time.

POSSIBLE SIDE-EFFECTS/COMPLICATIONS OF TREATMENT INCLUDE:

Some common reactions include swelling, redness, pain, itching, discoloration, bruising and tenderness at the treatment site and can be present for up to a week after treatment.

WHEN WILL I SEE RESULTS?

Some results can be seen at 2 weeks however some patients may only see results after completion of the course of treatment.

HOW MUCH WILL IT COST?

Prices vary depending on the size of area and the amount of areas that are treated. One area of treatment starts from £495.

WHO WILL CARRY OUT MY TREATMENT?

Dermal filler treatments will be carried out by one of our doctors or nurses here at Phi Clinic. All of which are highly experienced and trained by our medical director Dr Tapan Patel.

AFTERCARE INFORMATION

FOLLOWING TREATMENT YOU WILL EXPERIENCE:

- Swelling
- Tenderness
- Redness

These can persist for 1-2 weeks post treatment.

FOLLOWING TREATMENT WE ADVISE PATIENTS TO:

- Avoid strenuous exercise for 24 hours post treatment to decrease bruising risk
- Avoid saunas, steam rooms and anything that would cause the face to flush
- Avoid facials and facial massage for 24 hours
- If having large areas treated we advise patients reduce activity levels and rest

MEDICATIONS ADMINISTERED PRE OR DURING TREATMENT:

This treatment involves injection of Phosphatidylcholine and Deoxycholate.
